The network extension and service connection will be installed by Uisce Éireann or its Agents. For indicative costs associated with a network extension of this length, please refer to <https://www.water.ie/connections/information/connection-charges/>

- **Connections via third party owned assets can be permitted subject to the following conditions:**
- Written agreement should be obtained by the Customer from the 3rd party giving permission to the Customer to connect via 3rd party infrastructure.
- Confirmation shall be provided by the new customer, supported by design calculations (if required), that the 3rd party infrastructure has capacity and is structurally adequate. If IW deems a high level of risk involved, further information should be sought such as condition survey/CCTV survey, etc.
- It should be made clear to all parties that the 3rd party infrastructure remains classified as a service connection and is not assumed by any party to be adopted/taken in charge by Uisce Éireann following the new connection being made, unless it is expressly stated otherwise.
- The new customer and the 3rd party shall be treated individually for metering purposes.
- The Customer shall obtain a Wayleave (in favour of themselves) over the 3rd party infrastructure where possible. However, this is not a requirement that should prevent the connection being made if a wayleave is not forthcoming.

This letter does not constitute an offer, in whole or in part, to provide a connection to any Uisce Éireann infrastructure. Before the Development can be connected to our network(s) you must submit a connection application and be granted and sign a connection agreement with Uisce Éireann.

As the network capacity changes constantly, this review is only valid at the time of its completion. As soon as planning permission has been granted for the Development, a completed connection application should be submitted. The connection application is available at www.water.ie/connections/get-connected/
